**Wills Eye Institute - Pediatric Ophthalmology**

This text is part of the Color Atlas and Synopsis of Clinical Ophthalmology which was developed at Philadelphia's famed Wills Eye Institute. The beauty of this series is the powerful combination of illustrative photographs and a summary approach to the text. While the seven ophthalmic subspecialties in this series, Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveitis, employ varying levels of visual recognition, a relatively standard format for the text is used for all volumes. The goal of the series is to provide an up-to-date clinical overview of the major areas of ophthalmology for students, residents, and practitioners in all the healthcare professions.

Pediatric Ophthalmology was written in an effort to provide practicing ophthalmologists, pediatric ophthalmologists, and residents in training with a concise update of the clinical findings and the most recent treatment available for a wide spectrum of childhood ocular diseases. The atlas format should provide readers with a clear and succinct outline of the disease entities and stimulate a more detailed pursuit of the specific ocular disorders. The book features more than 150 4-color illustrations throughout and a short, succinct format which includes: Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.

**A Family Guide to Childhood Glaucoma and Cataracts**

Alex V. Levin 2014-12-03 "A Family Guide to Childhood Glaucoma and Cataracts" was developed as a tool to aid families in navigating the many questions that arise from the diagnosis and treatment of childhood glaucoma or cataract. Each chapter is presented in a question-and-answer format, with images that make certain concepts and processes easier to understand. In addition to basic information about glaucoma and cataracts, topics addressed include doctor visits, medications, treatment options, eye surgery, contact lenses and glasses, low vision, genetics and heredity, related conditions, such as amblyopia (lazy eye) and strabismus, social, educational, and other nonmedical concerns, and definitions of common terms used by medical professionals serving patients with glaucoma or cataracts. The PGCFA is a support group for parents and families dedicated to issues related to pediatric glaucoma and cataracts. This organization provides education and support to families of children with these diseases around the world through its membership meetings, website (http://www.pgcfa.org), discussion forums, and newsletter.

**Curbside Consultation in Pediatric Ophthalmology**

Rudolph S. Wagner 2013-05-01 "Are you looking for concise, practical answers to those questions that are often left unanswered by traditional pediatric ophthalmology references? Are you seeking brief, evidence-based advice for complicated cases or controversial decisions?
